Welcome to Urban Bonfire®

Urban Bonfire designs and manufactures functional, beautiful and high-performance outdoor kitchen and entertainment solutions for clients around the world. With a fully integrated in-house design team, efficient manufacturing and compatibility with most major outdoor appliances and countertop surfaces, Urban Bonfire is the market leader in outdoor space activation centered around family, friends, food and lasting memories.

Each Urban Bonfire outdoor kitchen system features a wide array of functional, aesthetic and finishing options to choose from. Every custom layout and design is configured to maximize outdoor cooking and entertainment space while offering versatility, integrated storage and a carefully curated series of colours, handles and finishing choices.

The Urban Bonfire® Framework

Planter Boxes

- Fully welded, powder coated marine grade aluminum
- Curated series with custom shapes, height and sizes available

Universal Track System

- Numerous interior accessory options to allow for easy customization
- Maximized efficiency, functionality and usage of every cabinet

Integrated Backsplash System

- Extruded aluminum with electrostatic powder coating
- Matching Clip-in Planters and accessories available

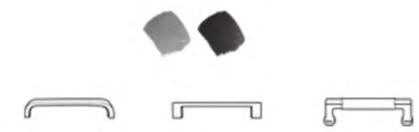

NACRAE™ Finish

Super durable NACRAE™ powder coating finish included on all cabinets, planters and accessories

Handles

Carefully curated designer-inspired color options and “living finish” bronze handle upgrades available in various shapes and tones

Construction

- Non-combustible thick gauge marine grade aluminum
- Outdoor grade 304 stainless steel hardware

Compatibility

- Custom trim kits for compatibility with major outdoor appliances brands and models
- Ready to receive Dekton® and other outdoor-rated countertop materials

A Solid Foundation

Commercial grade stainless steel leveling legs
Self-leveling toe kick that adapts to slope and outdoor site conditions

Our Pewter cabinet finish shown with our Bauhaus solid bronze handle in Black Bronze finish and Dekton® countertop in Opera finish.

Our Anthracite cabinet finish shown with our matching powder coated stainless steel handle and Dekton® countertop in Vera finish.

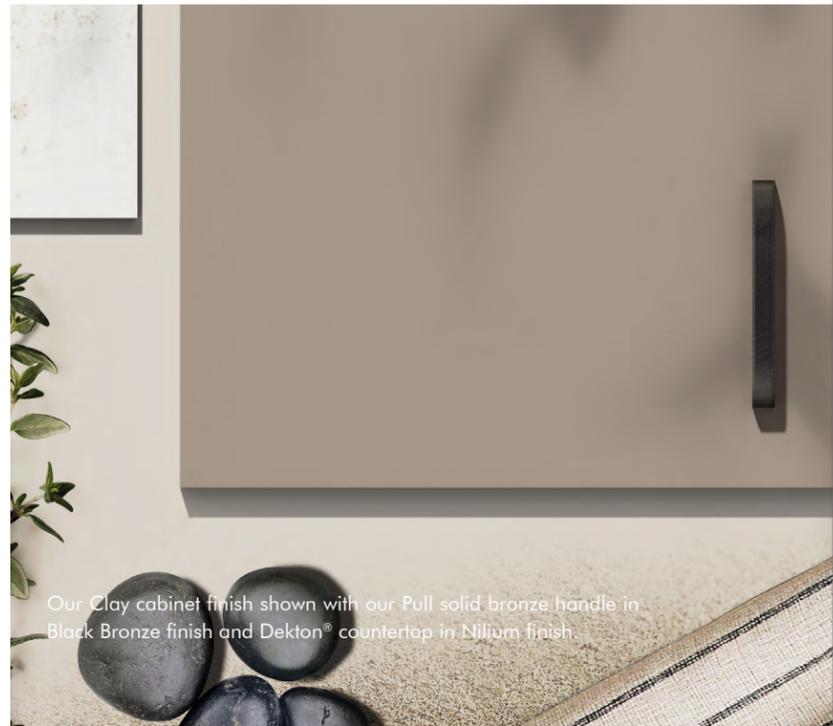

Our Chantilly cabinet finish shown with our Pull solid bronze handle in White Bronze finish and Dekton® countertop in Strato finish.

Our Onyx cabinet finish shown with our stainless steel handle and Dekton® countertop in Fossil finish.

Our Artesan cabinet finish shown with our Urban solid bronze handle in Black Bronze finish and Dekton® countertop in Edora finish.

Our Clay cabinet finish shown with our Pull solid bronze handle in Black Bronze finish and Dekton® countertop in Nilium finish.

Our Custom Design Process

We are dedicated to creating designs that are expressions of our clients' individuality. This passion for creative design makes the art of developing custom outdoor kitchen solutions highly engaging and interactive. We believe that custom outdoor kitchen systems should reflect the lifestyle, aesthetic and spatial parameters of every individual client.

Work with a member of our passionate and professional Design Team to experience your outdoor cooking and entertainment space possibilities.

Colors digitally rendered. Actual product may vary.

What's Included?

Personalised Service from one of our Experienced Designers

1-3 Initial Concepts

Technical 2D Plans and 3D Renderings

Final Design

Before We Start...

Gather basic dimensions of your space, plans, sketches, inspirational photos and any additional ideas for the vision of your space.

Step 1 Start Your Design Process

Your custom design process begins with a one-on-one virtual consultation with a dedicated Urban Bonfire designer to gather information about your lifestyle, aesthetic preferences and basic spatial parameters of your new outdoor room.

This will allow our team to determine the most appropriate layout and materials and present a custom solution that incorporates selected outdoor cooking appliances with integrated storage, functionality and counter space.

Try our simple **Request for Design form** as a first step to planning your new outdoor space and prepare for your consultation.

Our design team will work with you and/or your design professional to develop a preliminary layout that can be modified as necessary to meet with most spacial, aesthetic and budgetary parameters.

“How will your outdoor space integrate with the indoors for day to day and larger entertainment uses?”

“What types of cooking do you enjoy and for how many people?”

“What types of activities do you hope to enjoy in your new outdoor living space?”

Following the initial consultation, our design team will create a personalized proposal for your project.

Step 2 Design & Planning

Our proposal includes beautiful 3D renderings and 2D plans, as well as a detailed quote for your project. Appliances and countertop sold separately.

Design proposals are presented in a comprehensive package via a virtual meeting with your Urban Bonfire designer.

Step 3
Referral to an Authorized Urban Bonfire Dealer Partner

Urban Bonfire outdoor kitchen cabinets, planters and accessories are available through our growing network of dealers across North America.

Step 4
Production

Once the design is approved, we begin producing your kitchen in our Montreal facility. Lead times are typically about 6 weeks. US clients receive orders from our Champlain, NY distribution center. Canadian, European and Middle Eastern clients receive their orders from our Montreal, Canada distribution center.

Step 5
Quality Control & Packaging

Upon completion of our production process, each project must pass quality control and staging before final crating and shipping. With your kitchen staged in our bright assembly facility, each cabinet is inspected and numbered in accordance with your custom designed plan. With final inspection and staging complete, the fully assembled cabinets are packaged in their own, custom made, packaging and prepared for shipping.

Materials

Marine Grade Aluminum

Non-combustible, thick gauge marine grade aluminum construction for all Urban Bonfire cabinets, planters, accessories and backsplash systems.

Urban Bonfire's marine grade aluminum is twice as thick as most stainless steel cabinetry on the market, yet lighter in weight. Aluminum is easy to transport and cooperates well during installations. It is the ideal material for extreme climates (snow, ice, salt water, humidity) and long-term quality.

304 Stainless Steel Hardware

We use outdoor grade 304 stainless steel for our door slides, hinges, pulls and leveling legs.

NACRAĒ™ FINISH

Urban Bonfire's **NACRAĒ™** finish was inspired by the beauty, strength and resilience of mother-of-pearl. Each finish is crafted with a micro textured formulation that preserves and protects beauty, creating a stable depth of colour in all climates and any outdoor environment.

Now with revolutionary, all natural, anti-microbial protection.

NACRAĒ™ is engineered for life outdoors.

Standard feature on all Urban Bonfire products

Durable, 4-season formulation that resists scratches, fading and stains even in harsh climates.

FDA-approved and environmentally sustainable material and process.

Integrated all-natural anti-microbial properties for maximum safety and freshness.

A collection of specialty colours developed in collaboration with iconic designers.

Powder Coating Options

Our custom formulated “Super Durable” finishes are applied to AAMA 2604 standards. A slight textured finish adds depth to the colour and resists fingerprints. Available in 6 curated designer-inspired colours.

Onyx

A deep, dark black that is sure to create a standout piece in any environment.

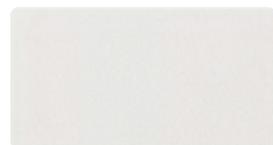

Anthracite

Modern dark gray with a slate undertone that works beautifully in concrete and contemporary urban environments.

Artesan

A dark gray finish with a warm bronze undertone. Designed to accent wood and natural limestone while still creating a welcome contrast through its depth of tone.

Chantilly

This crisp white works in almost any outdoor setting. Reflecting tones of silk and clean linen.

Clay

An elegant and versatile rich beige. Enhances the mood and atmosphere of any classic outdoor living space.

Pewter

Warm dark gray with bronze undertones. Adds a refined touch to any outdoor environment.

Handle Options

Each cabinet includes our premium outdoor grade 304 stainless steel handle. For added personalization and design, handle upgrades in powder coated finishes are available (optimal choice for heavy saltwater climates).

Included

316 Stainless Steel

Upgrade Options

Powder Coated Stainless Steel Handles

Upgrade Options

“Living Finish” Bronze Handles

For added personalization and design, handle upgrades in solid bronze are available. Our “living finishes” will weather over time as natural bronze changes tone and character as it gains charm.

Inspired

Newport Beach, California

Welcome to designer Anne Michaelsen Yahn's backyard. Located in Newport Beach, California, this expansive outdoor living and entertaining space is the epitome of indoor-outdoor living.

The outdoor kitchen is the center of attention of the space, located across from the home's indoor kitchen. Complete with an outdoor seating area, built-in bar, sink, ice machine and fire pit, this outdoor space is the perfect setting to cook, dine, entertain and relax with family and friends.

- 1) 48" Grill Base Cabinet A-GB48 (p.38)
- 2) 21" Utility Cabinet A-BF21-U (p.41)
- 3) 30" Power Burner Cabinet A-BB30 (p.39)
- 4) 4" Close Spacer Cabinet A-BF4-C (p.51)
- 5) 4" Spacer Cabinet A-BF4 (p.51)
- 6) 12" Utility Cabinet A-BF12-U (p.41)
- 7) 21" Flush Mount Cabinet A-BD21 (p.49)
- 8) 24" Open Shelf Cabinet A-BO24 (p.50)

Manhattan, New York

This New York city garden was designed by Hollander Design Landscape Architects with seasonality in mind, featuring flowers, evergreen shrubs, trees and grasses that keep vibrant throughout the seasons and allow for use of the space year-round.

The Urban Bonfire outdoor kitchen is the heart of this space, fully equipped with a 42" Wolf natural gas grill, functional sink, ample storage space and bar seating for entertaining smaller groups, with an adjacent patio and seated area for hosting large gatherings.

Our sleek Anthracite powder coating finish integrates beautifully with the home's neutral furnishings and greatly complements the vibrant greenery and cityscape.

- 6) 12" Utility Cabinet A-BF12-U (p.41)
- 7) 48" Grill Base Cabinet A-GB48 (p.38)

Photography: Eklund Gomes team at Douglas Elliman

Vancouver, British Columbia

With views of Vancouver's skyline and the North Shore Mountains, this penthouse terrace was designed by our Trade Ambassador Sherwood Outdoor Kitchens, in collaboration with our Dealer Partners Kerrisdale Lumber Home.

The homeowners enjoy hosting parties and wanted to design a multifunctional area. The outdoor kitchen includes a pull-out refuse and recycling accessory, sink, flush mount drawers, a 48" DCS grill, and generous counter surface for maximum preparation and cooking space while hosting large gatherings. Complete with a firepit, outdoor seating area, TV, sound system and outdoor heater, this is the home entertainer's dream.

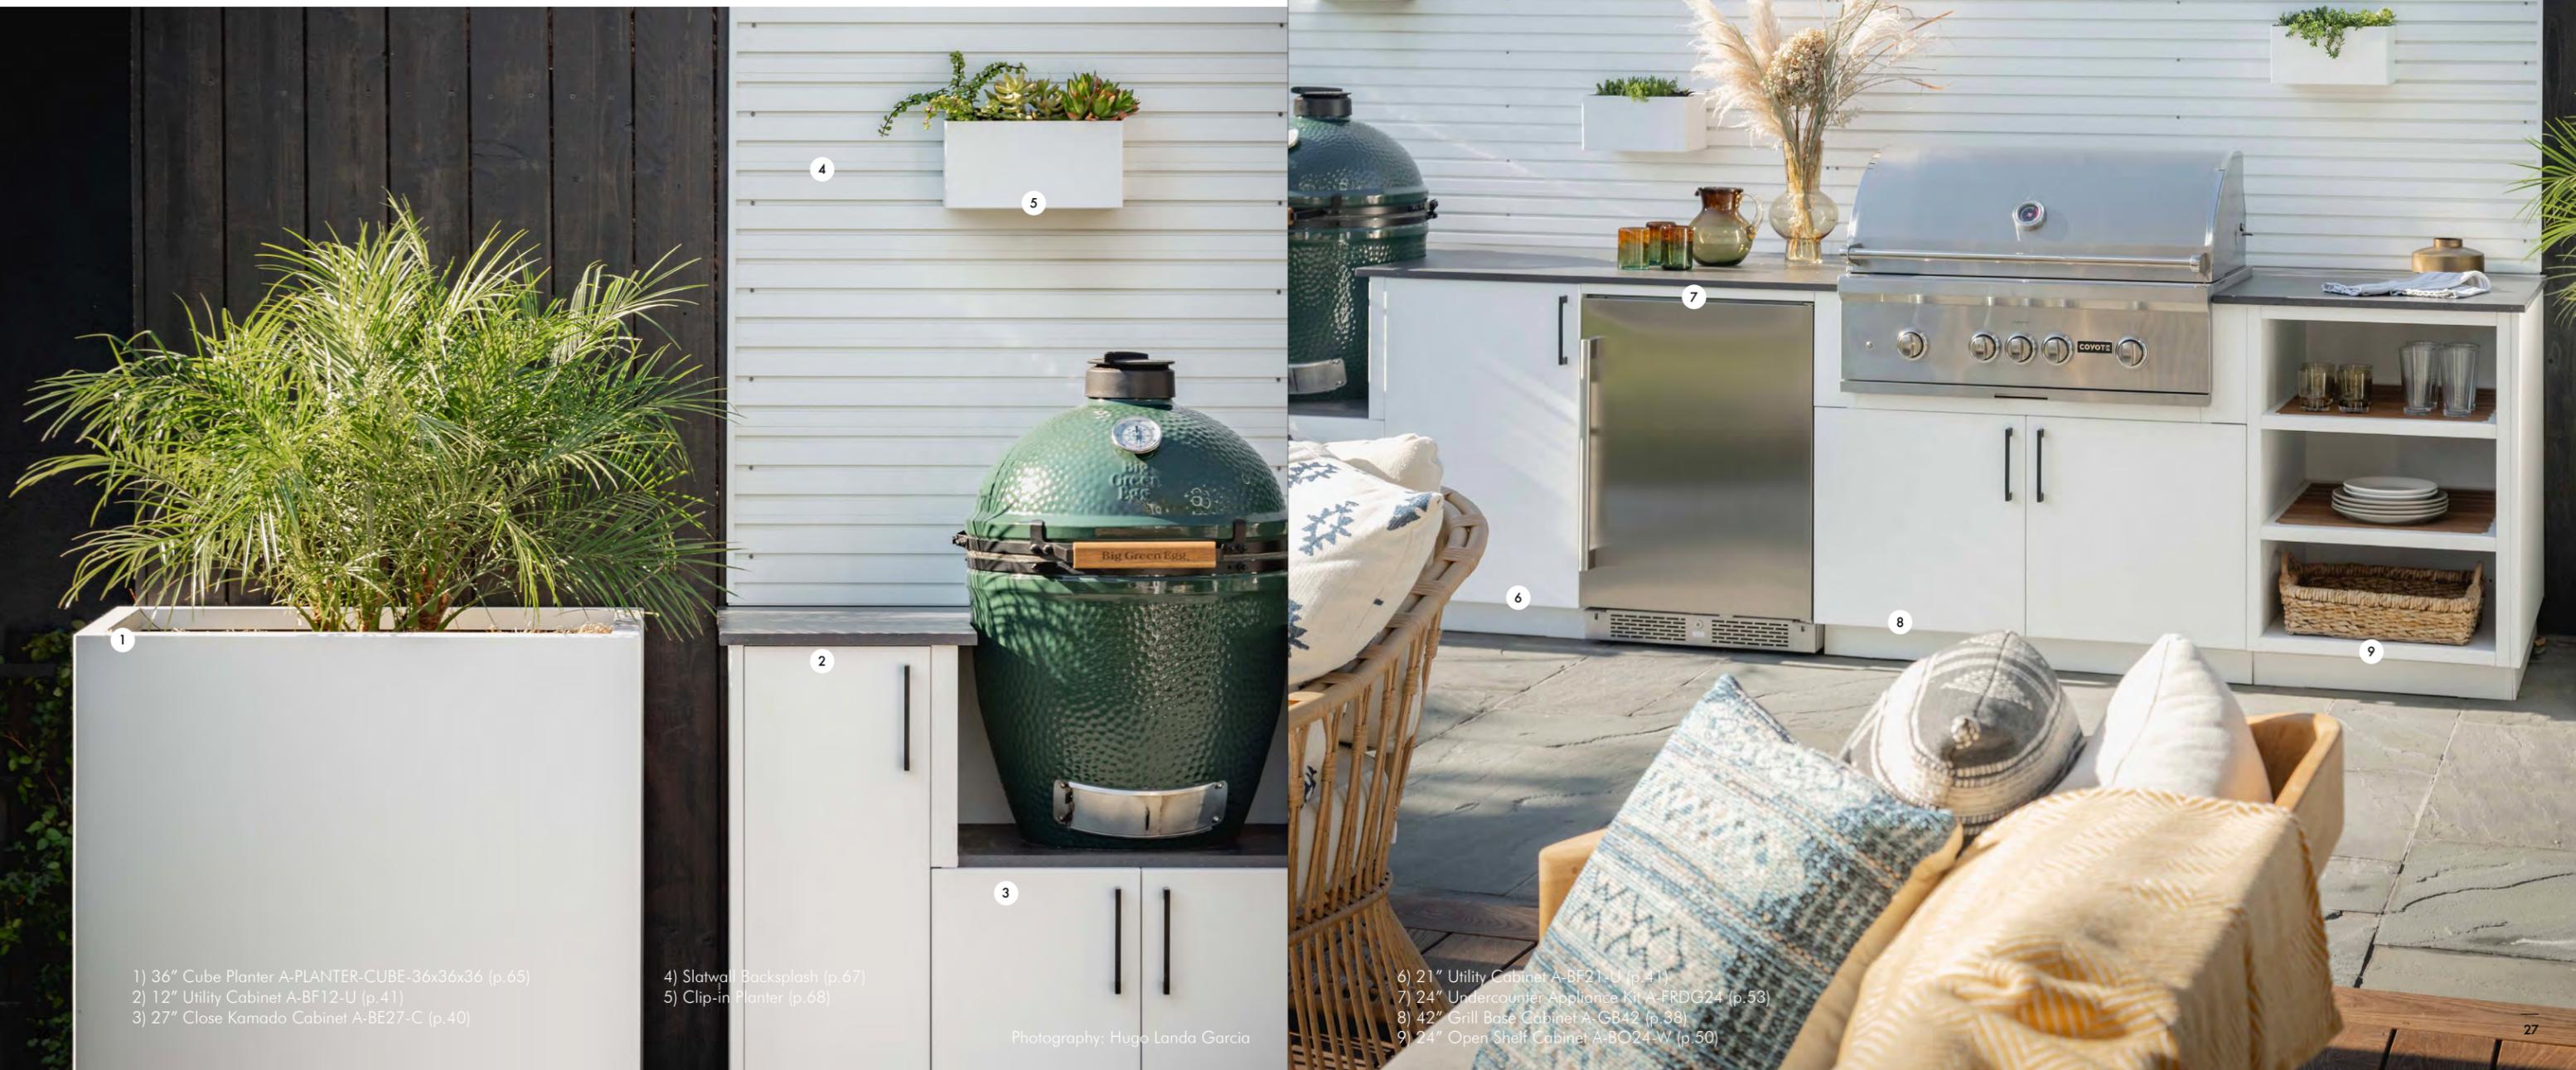

The space is located 30 stories up and completely exposed to the elements, which meant that choosing weather-resistant materials was essential. Urban Bonfire's powder coated marine grade aluminum cabinetry, paired with Dekton's high-performance countertop was the perfect combination for this coastal environment.

- 1) 21" Flush Mount Cabinet A-BD21 (p.49)

Photography: Sherwood Outdoor Kitchens

Los Angeles, California

Katee Sackhoff's stunning outdoor kitchen is presented here with our slatwall backsplash, Cube and Clip-in planters. Our Chantilly powder coating color and Urban handles in Black Bronze finish pairs perfectly with the natural wood accents of her patio set. Equipped with a Coyote built-in grill and a Kamado Big Green Egg.

Photography: Hugo Landa Garcia

Los Angeles, California

Located in the Woodland Hills neighbourhood of Los Angeles, this beautiful outdoor cooking and entertaining space perched on top of a hill creates the impression of floating while dining.

“We are really happy with our Urban Bonfire kitchen, but what we didn’t expect was to find a company that cared so much about their customers. Throughout the whole process multiple people reached out to us to make sure everything was going smoothly and after to ensure we were happy with the outcome, including some of the most senior people at the company. This level of service and commitment is a rarity today, and was a real joy to be a part of.”

- 6) 30" Utility Cabinet A-BF30-U (p.41)

Jersey City, New Jersey

Located in Jersey City, New Jersey, this beautiful outdoor cooking and entertaining space was featured in Anthony Carrino's latest series, *The Build*.tv, following the transformation of a historic firehouse into his new home.

Fully equipped with a 36" Coyote grill, Kamado, fridge and sink, this outdoor kitchen in our classic Chantilly powder coating integrates nicely with the brick exterior of the firehouse, creating a beautiful continuation between the indoor and outdoor cooking areas.

- 1) Slatwall Backsplash (p.67)

Partition, Trough & Cube Planters

Technical Details

Fully welded thick marine grade aluminum, powder coated and built to last. Each Cube, Partition and Trough Planter comes equipped with pre-machined drainage holes and 1 1/2" geotextile covered insulation.

Slatwall Backsplash

Our extruded aluminum modular backsplash system is available in our standard powder coating finishes. Designed to be both aesthetic and functional, these 6" tall panels can be configured to various heights and can house planters and other accessories.

Our backsplash system must be installed against an existing wall or structure. Installation requirements may vary based on site conditions, local codes, equipment specifications and other factors. Check with your local licensed professional to ensure full and complete compliance to codes.

Model	Width	Length
Small Panel (A-SLATWALL-SMALL PANEL)	6"	6" - 48"
Large Panel (A-SLATWALL-LARGE PANEL)	6"	48 1/8" - 96"
